

Certificate

OF ENVIRONMENTAL STEWARDSHIP

The Gary Residence
diverted 5,400 pounds of food scraps from disposal in 2017.

Your efforts help protect Vermont's environment by reducing greenhouse gases and mitigating climate change, extending the life of Vermont's landfill, and building organic soils used by home gardeners, landscapers, farmers, and possibly your business or school!

On behalf of all of us at Grow Compost, thank you for being a critical part of the food cycle!
